

659 Year Secular - Jewish Calendar

1582-2240

5342-6000

The secular calendar currently in use is the Gregorian Calendar. It was introduced in 1582 to replace the Julian Calendar [introduced by Julius Caesar in BC 45]. It took over 300 years for all the different countries to switch from the Julian Calendar to the Gregorian Calendar. The Julian Calendar had a leap year (366 days – February 29th) once every 4 years which made the average year 365 days and 6 hours. However, because the interval between one Vernal (Spring) Equinox and the next is 365 days, 5 hours, 48 minutes and 46 seconds, the average year in the Julian Calendar was 11 minutes and 14 seconds too long. Over a period of 1600 years the dates in the Julian Calendar were more than 10 days out of sync with astronomical events like the Vernal Equinox and the Winter Solstice. To rectify this situation Pope Gregory XIII introduced the Gregorian Calendar by papal bull in 1582. [The Jewish Calendar is based on the average year being 365 days, 5 hours, 55 minutes and 25 seconds].

The Gregorian Calendar has 97 leap years in every 400 years. Year 1600 was a leap year; years 1700, 1800 and 1900 were not leap years. Year 2000 was a leap year; years 2100 and 2200 will not be leap years. The average year is 365 days, 5 hours, 49 minutes and 12 seconds which is just 26 seconds longer than the solar year. That papal bull also decreed that 10 days be omitted from the calendar (October 5 to October 14 1582) in order to get the calendar back [more or less] in sync with the solar year. If the change to the Gregorian Calendar was made after year 1700 then 11 days had to be omitted from the calendar. If the change was made after 1800 then 12 days had to be omitted from the calendar. If the change was made after 1900 then 13 days had to be omitted from the calendar. On page 662 there is a list when different countries made the switch from the Julian Calendar to the Gregorian Calendar.

For Italy, Poland, Spain, Portugal and most areas of France the calendar is correct for all the 659 years. For U S A, Canada and the U K the calendar is correct from 1753 to 2240 (the end of the calendar). For all other countries the calendar is correct from at least 1927 until 2240. For the period between 1582 and 1926 please see page 662.

In the calendars listed on the following pages, the secular date is followed by the Jewish date, and day of week. After the day “Shabbos” there are numbers between 1 and 66. These numbers refer to the Parsha of that Shabbos. In the following page there is a list showing which Parsha refers to which number. When the Parsha in Eretz Yisroel is different than that of Chutz Lo’oretz, there is a second number following “Shabbos”, which is surrounded by a border, this number refers to the Parsha in Eretz Yisroel.

On page 676 there is a chart showing the dates for Birchas Hachamah [Birchas Hachamah is based on the year being 365 days and 6 hours]. The secular dates are based on the Gregorian Calendar being instituted in 1582. Prior to 1582 Birchas Hachamah was always said on March 26.

On pages 677 and 678 there are charts showing the start dates for **ותן טל ומטר** in Chutz L’Oretz. [The start date for **ותן טל ומטר** is based on the year being 365 days and 6 hours]. The secular dates are based on the Gregorian Calendar being instituted in 1582. Prior to 1582 the start date for **ותן טל ומטר** was always, either on November 22 or November 23. When **ותן טל ומטר** is only said after Chanukah, that date is surrounded by a border.
